

Creative Commons Licences

MOST FREE

ATTRIBUTION

CC BY

This license lets you distribute, remix, tweak, and build upon the original work, even commercially, as long as you credit the original creation. This is the most accommodating of licenses offered.

ATTRIBUTION-SHAREALIKE

CC BY-SA

This license lets you remix, tweak, and build upon the original work even for commercial purposes, as long as you credit the original work and license your new creations under the identical terms. This license is often compared to "copyleft" free and open source software licenses. All new works based on the work should carry the same license, so any derivatives will also allow commercial use. This is the license used by Wikipedia.

ATTRIBUTION-NODERIVS

CC BY-ND

This license allows for redistribution, commercial and non-commercial, as long as it is passed along unchanged and in whole, with credit to the original work.

ATTRIBUTION-NONCOMMERCIAL

CC BY-NC

This license lets you remix, tweak, and build upon the original work non-commercially. Your new works must be non-commercial and acknowledge the original work, but you don't have to license your derivative works on the same terms.

ATTRIBUTION-NONCOMMERCIAL-SHAREALIKE

CC BY-NC-SA

This license lets you remix, tweak, and build upon the original work non-commercially, as long as you credit the original work and license your new creations under the identical terms.

ATTRIBUTION-NONCOMMERCIAL-NODERIVS

CC BY-NC-ND

This license is the most restrictive of the six main licenses, only allowing you to download the original work and share it with others as long as you credit the original work. You can't change the original work in any way or use it commercially.

LEAST FREE

Foter, "[CC License Freedom Scale Chart](#)," Wikimedia Commons, CC BY-SA 3.0.

The openness of an open education resource is communicated through a Creative Commons licence. These licences act like a permission authorizing the public to share, remix, adapt, and reuse the OER as long as the conditions of the licence are respected.

Resources with the ND condition are technically not OER. ND indicates that the original version cannot be modified to be incorporated into a new resource. This condition goes against two of the five Rs: revising and remixing.

To learn more about open licences and copyright for OER, complete eCampusOntario's "[Open Licensing](#)" module.
